

Report of Health Education Campaign for Swachh Bharat Summer Internship Program:

Health Education Campaign was conducted on 15.05.2018 in Makkalur village by student volunteers. People were educated about hazards of open field defecation, hygienic practices, solid and liquid waste management. Various audio visual aids such as flash cards, computer assisted power point slides and flip charts were used for educating the public in various places of Makkalur village. People responded well for the health education program which was observed by their responses and they replied that it was much useful for them to know about the hazards of open field defecation.
